## FACE IMAGE BUTTONS

For the first learning task, which face image category was associated with the **BUTTON** "V"?

Young and Female

Young and Male

Old and Female

Old and Male

For the first learning task, which face image category was associated with the **BUTTON** "B"?

Young and Female

Young and Male

Old and Female

Old and Male

For the first learning task, which face image category was associated with the **BUTTON** "N"?

Young and Female

Young and Male

Old and Female

Old and Male

For the first learning task, which face image category was associated with the **BUTTON** "M"?

Young and Female

Young and Male

Old and Female

Old and Male

## StructureQs

When you had to learn the button response that was correct for each object image category, did you notice a structure in how the button responses were organized?

Yes

No

Did the structure depend on the dimension (e.g. age/gender)?

Yes

No

How did you decide on your button responses?

I always used Age (e.g., If "old", then I'll press v for female, n for male).

I always used Gender (e.g., If "female", then I'll press v for young, n for old).

I used a combination of Age and Gender, depending on the category.

I didn't use the dimensions; I just memorized that Young Female faces were on button v, Old Male faces were on button b, etc.

## SubjectiveDifficulty

How difficult did you find this task?
