## OBJECT IMAGE BUTTONS

In the first task, which image category was associated with the **BUTTON "V"**?

Red and Square

Blue and Square

Red and Circle

Blue and Circle

In the first task, which image category was associated with the **BUTTON "B"**?

Red and Square

Blue and Square

Red and Circle

Blue and Circle

In the first task, which image category was associated with the **BUTTON "N"**?

Red and Square

Blue and Square

Red and Circle

Blue and Circle

In the first task, which image category was associated with the **BUTTON "M"**?

Red and Square

Blue and Square

Red and Circle

Blue and Circle

## StructureQs

When you had to learn the button response that was correct for each image category, did you notice a structure in how the button responses were organized?

Yes

No

Did the structure depend on the image border properties (color/type)?

Yes

No

How did you decide on your button responses?

I always used Border Color (e.g., If "red", then I'll press v for square, n for circle).

I always used Border Type (e.g., If "square", then I'll press v for red, n for blue).

I used a combination of Border Color and Border Type, depending on the category.

I didn't use the dimensions; I just memorized that Red Square objects were on button v, Blue Square objects were on button b, etc.

## SubjectiveDifficulty

How difficult did you find this task?
